

hello,

First of all, I need to say that I am very happy because you choose my design to your blog.

It's a true honor!

Second, there are a few things I wanna that you know:

1. Install the theme and configure your widgets first on a blog of tests to avoid bugs on your main blog. Blogger will keep your widgets content from blog of tests to your main blog.
2. The theme is compatible with Blogger Template Designer: you can change fonts and colors with no need to edit CSS.
3. Some of widgets are blocked because they are customized. If you need help to change the place or remove any of them, get in touch.
4. If you want help to add or replace any social media icons, contact me on etsy or email.
5. The related posts widget requires labels to work. If you don't add labels, they will not be visible.
6. I do not offer support for Internet Explorer. It's an obsolete browser that precludes the use of new development techniques and, because it's old, doesn't offer much security against third-party attacks.
7. If you find any bug on theme, please report so I can fix and update the .xml file.

Instructions & Setup

Please visit

<http://shop.gabrielamelo.com.br>

I'll be here if you need help with something. Feel free to send me an email, but keep in mind that I live in Brazil, time zone UTC 3:00. The answer may take 24h-48h.

Thank you so much,

Gabriela
